SUMMARY

Final-year B. Tech student in Artificial Intelligence and Data Science with hands-on experience in data analysis and machine learning. Skilled in Python, SQL, and Power BI, with experience building and deploying analytics and ML projects. Passionate about leveraging data to drive meaningful insights and scalable solutions.

TECHNICAL SKILLS

- Programming: Python, Java
- Data Analysis & ML: Pandas, NumPy, Matplotlib, Scikit-learn
- Visualization: Power BI
- Databases: MySQL, MongoDB
- Web (Working Knowledge): HTML, CSS, JS, React
- Version Control: Git, GitHub

INTERNSHIPS

Data Science Intern - Network Geek, Chennai

July 2025 – August 2025

- Performed data cleaning and EDA on datasets containing 10,000+ records using Pandas and NumPy to identify patterns and data inconsistencies.
- Improved dataset quality by handling missing values, reducing preprocessing errors and improving model readiness.

Full Stack Web Development Intern — Intern Ezy, Remote

January 2025 – March 2025

- Built and maintained responsive web applications using React, HTML, CSS, and JavaScript.
- Strengthened front-end development skills by creating interactive UI components and optimizing user experience.

PROJECTS

- **Spam Mail Classifier (ML & Deployment):** Developed and deployed a Flask-based spam detection system by training a Logistic Regression model on 5,572 labelled emails using TF-IDF (~7,500 features), achieving 97% test accuracy.
- **Weather App (Web Development):** A responsive React weather application that retrieves real-time data from the OpenWeatherMap API in under 500 ms per request and ensures 100% device compatibility using CSS media queries.
- **RAG Chatbot (Generative AI):** Built a local RAG-based chatbot using Flan-T5, Sentence Transformers, and Qdrant to answer questions from PDFs via a Stream lit interface
