PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence and Data Science with hands-on experience in Python, machine learning, data analytics, and AI-driven projects. Skilled in developing intelligent applications, analysing data, and applying ML techniques to solve real-world problems. Interested in ML, data-driven systems, and scalable intelligent solutions.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, Java(basics)
- **Data & ML:** Pandas, NumPy, Scikit-learn, EDA
- **Visualization:** Power BI, Data Visualization
- **Databases:** MySQL, MongoDB
- **Tools and Web Basics:** GitHub, Flask (Basics), HTML/CSS (Basics)

EXPERIENCES

Data Science Intern - Network Geek, Chennai July 2025 – August 2025

- Performed data cleaning and exploratory data analysis on structured datasets using Pandas and NumPy.
- Worked on preprocessing techniques like handling missing values, preparing datasets for machine learning tasks.
- Worked on Python-based data analysis workflows and basic ML model implementation.

Full Stack Web Development Intern - Intern Ezy, Remote January 2025 – March 2025

- Developed responsive web application projects using HTML, CSS, JavaScript, and React.
- Built interactive UI components and improved frontend responsiveness across devices.
- Gained practical exposure to web development workflows and deployment basics.

PROJECTS

RAG Chatbot (Generative AI): Tech stack - Python, Sentence Transformers, Qdrant, Flan-T5

- Built a Retrieval-Augmented Generation (RAG) chatbot to enable document-based question answering.
- Implemented semantic search using Sentence Transformers and Qdrant for efficient document retrieval.
- Integrated Flan-T5 with Streamlit to generate context-aware responses from PDF documents in real time.

Stock Trend Prediction System (ML + NLP): Tech Stack - Python, FinBERT, Random Forest, Flask.

- Developed a stock trend prediction system using FinBERT-based sentiment analysis and historical stock market data.
- Built a Random Forest model to predict stock market movement based on extracted sentiment and price features.
- Deployed the solution using Flask to deliver real-time stock movement predictions.

EDUCATION

B.Tech - Artificial Intelligence and Data Science 2023 – 2027(Expected)
Rajalakshmi Engineering College CGPA: 8.29

Class 12 (HSC) 2022 – 2023
Everwin Vidhyashram, Kolathur Percentage: 92.6%

Class 10 (SSLC) 2020 – 2021
Everwin Vidhyashram, Kolathur Percentage: 81.4%

ACHIEVEMENTS

- Secured overall 2nd place in Aptitude Premiere League Contest
- Shortlisted Team - Smart India Hackathon (Internal Round)

CERTIFICATIONS

- Honours Diploma in Computer Application (HDCA) - Cyber Soft Solutions
- Data Analyst Course – Udemy
- Python Certificate - Hacker rank
